

EXTERIOR DOOR COLLECTION

inspire | create

ALL WEATHER  
WINDOWS

The All Weather Windows 238,000 sq. ft. state-of-the-art manufacturing plant and showroom in Edmonton, Alberta, Canada. The facility houses our Edmonton sales, service, corporate services and support staff.

All Weather Windows manufactures a full line of quality windows and entry doors. Homeowners, contractors, dealers and builders rely on All Weather Windows for a comprehensive line of durable entry systems that add value and beauty to any home. Let us be your first choice for all your door and window needs.

## WE KNOW HOW TOUGH CANADA'S WEATHER CAN BE

Extreme weather is what separates good windows and doors from bad ones. As a company born and raised in Canada, we know what it takes to make products that stand up to our extraordinary seasons.

From heavy west coast rain to unforgiving blizzards on the prairies and the bitter cold of the north, our doors and windows have been rigorously tested for every climate in every possible weather outcome to meet North American Fenestration Standards (NAFS).

After all, just because you have to live with Canadian weather, doesn't mean it has to live with you.

## WE LEAD THE SCENE FOR KEEPING IT GREEN

Canadian weather may have its ups and downs, but our environment needs to be respected and preserved. That's why we promote sustainable initiatives by partnering with key environmental organizations and building councils like the Canada Green Building Council, Canadian Home Builders' Associations, Canadian Standards Association, NRCAN and Built Green Canada.

We live our sustainable values as an ENERGY STAR® program ambassador. We were awarded the Sustained Excellence Award in 2018 and Manufacturer of the Year five times in the last decade. Most recently, we received the ENERGY STAR® Special Recognition award in 2023 for our continuous commitment to energy savings.

# your dream door **starts here**

## inspire | create

PAGES 04 - 91

We know how much work goes into making beautiful, stylish and durable doors and choosing one should be an effortless process. That's why we've put together this inspirational collection of entry doors. You don't need to worry about the quality of your door - you simply need to decide which one is right for you.

To help you find the absolute best door to fit your vision and style, we want you to be inspired without feeling overwhelmed by technical jargon. That's why we've split our catalogue into two distinct sections: Inspire & Create.

The first section **INSPIRE** is dedicated to doing just that - inspiring the perfect match. At a glance, you will be able to narrow your choices down to doors that you love and rule out any styles that simply don't match your vision.

Explore door materials, glass styles and decorative door lite designs, while using product highlights to assist you in making the perfect selection to match your style and taste.

PAGES 92 - 131

Once you've found the perfect door, it's time to get creative and put all that inspiration to work. That brings us to **CREATE**.

In the Create section, you will find all the technical information necessary to see your vision come to life. From door slab sizing and rough openings, to frame material and hardware finishes, you'll find it all here. This section also serves as a quick and easy reference for comparing door styles, sizing and availability.

You will notice that all pages in the **INSPIRE** section refer to their corresponding page in the **CREATE** section, making it that much easier to build your dream door.

Be inspired. Get creative.

## BASIC ISN'T SO BASIC

Who said basic isn't beautiful? Sometimes the most daring statements are made in the subtlest way. Flush doors perfectly compliment mid-century modern and art deco architecture, especially with a burst of colour.

**FLUSH** smooth fibreglass door 40 full clear glass sidelites pre-finished in slate

**FLUSH** smooth fibreglass door 40 full clear glass sidelite & transom

# choosing a door inspired by you

Beyond the functionality, the type of door you choose can say a lot about who you are. Welcoming. Bold. Charming. These are just a few of the words that come to mind when thinking about the connection between door and homeowner.

Choosing the right doors for your home shouldn't feel overwhelming. To help you choose the doors that deliver the appearance and performance you want, keep these three simple steps in mind as you explore our catalogue:

## 1 BE INSPIRED

Let your personal style and vision guide you in selecting the perfect door.

Think about your own personality. Do you like to make a statement or do you prefer a subtle effect? Is your home's style more classic or contemporary? Do you have a specific colour scheme in mind?

We have many options so take your time to be inspired and discover your style.

## 2 CHOOSE YOUR MATERIAL

Doors are built with a variety of material and each material offers its own benefits and aesthetic appeal.

Choose from woodgrain-textured fibreglass that has the appearance of real wood, smooth fibreglass that can be painted any colour, or one of our prefinished steel skin doors for added security.

Be sure to consider the right material to meet your individual needs for you and your home.

## 3 ACCENTUATE

This is when you can really begin to customize your door and bring your vision to life.

Choose from a variety of custom sidelites, designer transoms and decorative glass inserts while tying all the accents together by coordinating grille, casing and hardware colours.

Whatever the desired end product, these options can make the bold or subtle statement you're looking for.

# DOORS AT A GLANCE

## BARRINGTON® SIERRA® MAHOGANY TEXTURED FIBREGLASS

Taking inspiration from the craftsman style, Sierra introduces elegantly embossed panels for a bold take on a traditional look.

\$\$\$\$

## CONTEMPORARY CHERRY TEXTURED FIBREGLASS

Using NVD Technology, cherry grain doors achieve a wood grain texture that is indistinguishable from real wood.

\$\$\$\$

## CONTEMPORARY CHERRY TEXTURED FIBREGLASS

Simple and pure in design, our contemporary cherry collection achieves bold, modern design with all the benefits of fiberglass.

\$\$\$

### AUTHENTIC EMBOSSING

*Deep, defined embossing mimics that of traditional hand-crafted wood doors.*

### STAINLESS STEEL EMBELLISHMENTS

*Stainless steel strips are inlaid directly into the fiberglass skin.*

### GROOVED LINES

*Gentle, recessed lines are engraved right into the fiberglass skin.*

### MATCHING STILES

*Real mahogany-capped, square edge stiles offer an authentic wood look.*

*discover more on p. 28*

### CONTEMPORARY CHERRY GRAIN

*Cherry grain brings warmth and modern texture to any entry way.*

*discover more on p. 30*

### OVERSIZED STILES

*Oversized 4-1/8" LSL stiles give added strength and help prevent warping.*

*discover more on p. 30*

# DOORS AT A GLANCE

## RUSTIC MAHOGANY TEXTURED FIBREGLASS

Our luxury textured fibreglass rustic doors add warmth to your home while accentuating personal style with a distinctly European feel.

\$\$\$

## VISTAGRANDE™ FIR TEXTURED & SMOOTH FIBREGLASS

Instantly brighten and beautify any space with wider, factory-flush glazing - you can truly bring the outdoors in.

\$\$\$

## CRAFTSMAN SMOOTH FIBREGLASS

With a pre-pigmented white skin, smooth craftsman doors are a beautiful, long-lasting alternative to steel entry doors.

\$\$\$

### AUTHENTIC EMBOSSING

*Deep, defined embossing mimics that of traditional hand-crafted wood doors.*

### LUXURY MAHOGANY GRAIN

*Detailed texture replicates real mahogany grain.*

*discover more on p. 32*

### CUSTOM FACTORY FLUSH-GLAZING

# OPERATING STYLES

## MORE THAN JUST THE SWING

In or out? Left or right? Single or double? A transom perhaps? Maybe a sidelite or two? The options are endless. Designing your door can be as simple as matching an existing door or as complex as a multi-part configuration. It's all up to you. Be bold. Be creative!

## DOUBLE & GARDEN DOORS

Double and garden doors may seem similar, but there is one noticeable difference. Garden doors consist of one main operating door and one fixed or venting door with a stationary centre post. Double doors however, can be fully opened to create a single large opening. The centre post, known as an astragal, is attached to one of the two doors. The astragal post uses top and bottom flush-bolts to secure it into place when both doors are not in use.

### GARDEN DOOR

*left door slab is operating, right door slab is venting. Centre post is stationary*

### DOUBLE DOOR

*left door slab is operating, right door slab is inactive with centre post (astragal) attached*

## SIDELITES

Sidelites not only enhance the look and size of your door, but they can also add additional benefits. Using a full glass sidelite can increase the amount of sunlight that enters into your home while maximizing the overall width of your door. Full glass sidelites can also be customized to varying widths. Adding venting panel sidelites can help promote airflow and increase ventilation. Sidelites are available in hundreds of styles to perfectly and seamlessly match your door.

### FULL GLASS SIDELITE

*clear or textured sealed units are glazed directly into the door frame and cannot be vented (door shown as an outswing)*

### PANEL SIDELITE

*12 or 14 inch door panels are either fixed into the door frame or vented out using a crank mechanism (door and sidelite shown as an outswing)*

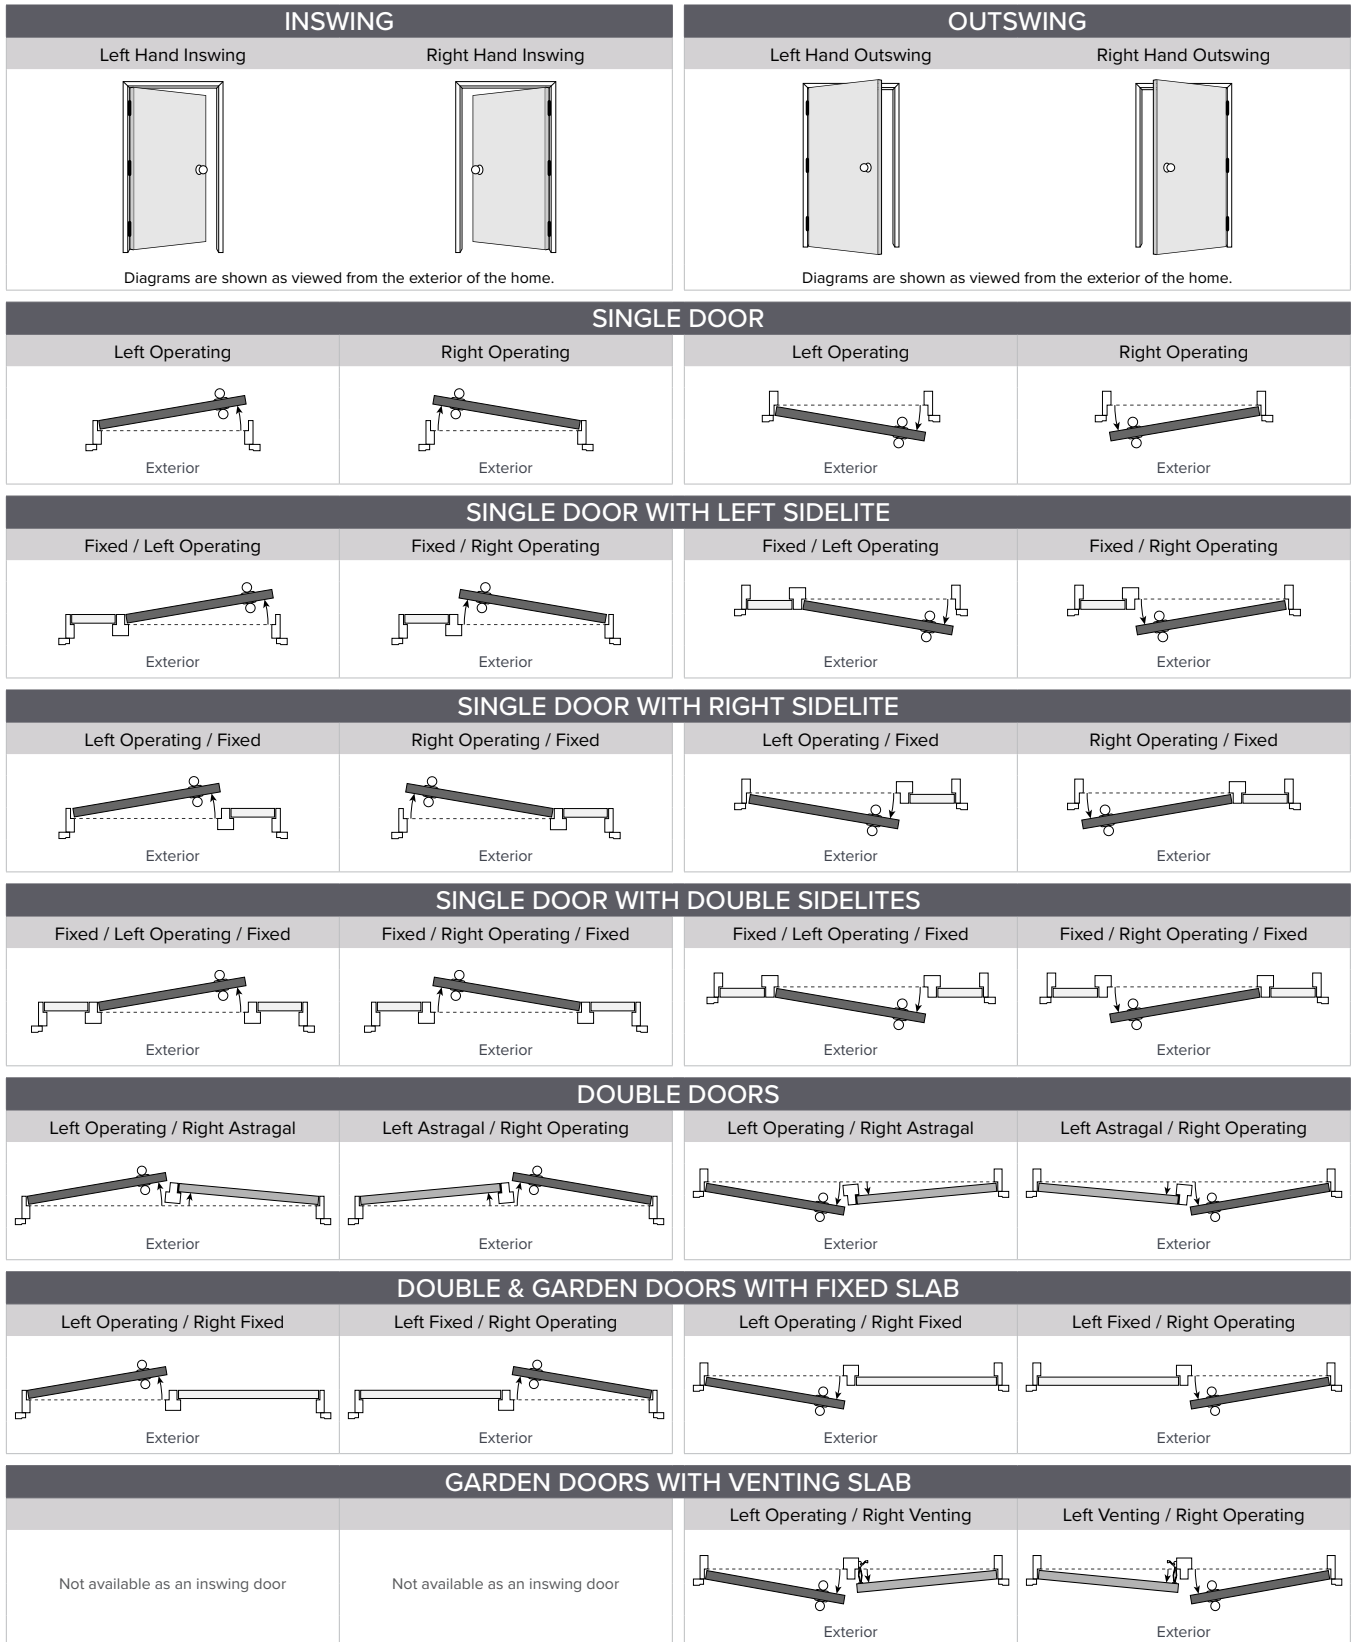

## TRANSOMS

Limited by width? Why not go higher? Transoms allow increased sunlight into your home while increasing beauty and elegance. Transoms are fully customizable with a large selection of shapes, sizes and clear and textured glass options.

Note: Garden doors include an interior "in-frame" screen on the venting slab only. A sliding exterior screen is available on garden doors only when the following 3 conditions are met: 1) inswing configuration, 2) one slab is fixed, 3) 6-9/16" minimum jamb depth. Screens are not available on double door configurations. Venting sidelites may not meet current building codes for your area.

# HANDING & SWING

Note: Additional handing and swing options may be available depending on your door configuration. Talk to an All Weather Window representative to help you design a door that works best for you.

# FIRE RATED DOOR SYSTEM

## THE ULTIMATE FIRE RATED DOOR SYSTEM

Our 90-minute fire rated door system comes pre-hung and utilizes the innovative adjustable Fast-Frame® by Timely®. Fast-Frame's® advanced design adds a new dimension of flexibility and durability to our steel entry door line. Featuring a full 1" of adjustability, the frame can accommodate almost any variation of wall construction. This easy-to-install, user-friendly, kerfed white galvanized steel door frame system is applicable to a full range of residential and commercial applications—wood or steel stud construction. Our fire rated door system is engineered to meet the most stringent code requirements including structural, impact and 90-minute fire ratings.

A 20-minute option is also available and includes a wood finger joint pine (FJP) jamb.

## FAST-FRAME® CONSTRUCTION<sup>1</sup>

<sup>1</sup> Fast-Frame® is available on 90-minute fire rated door systems only.

Note: For more information on fire rating requirements and to order, please talk to an All Weather Windows representative. Extended lead times apply.

## FIRE LABELS

Our fire rated door systems include a 20 and 90-minute fire rating option. This includes all components of the door frame, steel door slab, hinges, and striker plates.

## WARRANTY

A 2 year limited manufacturer warranty against defects in materials and craftsmanship is included on all fire rated door systems.

## CLOSURE TEST

Fire rated door systems will close and latch from 18" if the following Fast-Frame<sup>®1</sup> components are used:

- » QEBD500 compression weatherstripping
- » factory sweep
- » adjustable T-strike
- » factory supplied sills
- » self-closing hinges

## DOOR STYLES

Both 20 and 90-minute options are available in a 6-panel steel skin slab. 90-minute doors also come with a steel flush slab option.

## FEATURE & SIZING AVAILABILITY

	20-MINUTE	90-MINUTE
Slab Construction	Wood Edge	Steel Edge
Jamb	Finger Joint Pine (FJP)	Steel Fast-Frame <sup>®</sup>
Glass Inserts	No	No

## ROUGH OPENINGS

FIRE RATED DOOR SIZING & ROUGH OPENINGS		
	Nominal Door Size	Rough Opening Size (wood stud)
6'8" Height	2'6" x 6'8"	31-1/4" x 81-3/8"
	2'8" x 6'8"	33-1/4" x 81-3/8"
	2'10" x 6'8"	35-1/4" x 81-3/8"
	3'0" x 6'8"	37-1/4" x 81-3/8"
8'0" Height	2'8" x 8'0"	33-1/4" x 97-3/8"
	2'10" x 8'0"	35-1/4" x 97-3/8"
	3'0" x 8'0"	37-1/4" x 97-3/8"

Note: All dimensions shown are for doors with a standard inswing sill  
Deduct 13/16" for bumper, outswing or handicap compliant sills

### FAST-FRAME<sup>®</sup> SILLS<sup>1</sup>

#### STANDARD INSWING

Thermally broken - 5-5/8" width with optional extenders  
Note: Not for use on outswing applications

#### BUMPER OUTSWING

4-9/16" width with integrated weather seal.  
Note: Not for use on inswing applications.

#### HANDICAP (ADA)

Double slope 4-9/16" & 6-9/16" widths

STRUCTURAL PERFORMANCE & IMPACT RATING: Design pressure ratings are available for compliance with national, state and local wind load and/or missile requirements. Product tested for structural and impact performance in accordance with TAS 201, 202, and 203. Product approval available under the Florida Department of Community Affairs (FL10357). Note: Structural and Impact performance requires use of a hurricane grade 5/8" T-astagal for double doors.

# NAFS

## WHAT IS NAFS?

The North American Fenestration Standard (NAFS) is designed to combine the fenestration testing and ratings process into a harmonized North American Standard. It has been incorporated into the National Building Code of Canada and implemented across Canadian provinces.

NAFS Certification requires stringent standards be met for:

- » Air tightness
- » Water penetration resistance
- » Structural performance under wind loads
- » Forced entry resistance

*All Weather Windows offers NAFS tested and certified windows and doors, available in nearly every product series and configuration\*. Each NAFS certified product is clearly labeled, outlining the PG value and any specific ratings such as water and air resistance values.*

## PERFORMANCE GRADE & CLASS<sup>1</sup>

Ratings are based on a combination of a product's structural properties and its ability to resist water. As a result, a single numeric rating is assigned to each product. This rating is called the **PERFORMANCE GRADE (PG)**.

NAFS has also categorized the application of fenestration products into four groups. Each of these groups is called a **PERFORMANCE CLASS**. Each class requires products that meet a minimum performance grade.

The performance classes and applicable minimum performance grades are:

- R:** Residential (one and two family) - minimum PG15
- LC:** Light Commercial (low rise and multi-family dwellings) - minimum PG25
- CW:** Commercial Window (low rise and multi-family dwellings, higher loads and larger sizes) - minimum PG30
- AW:** Architectural Window (mid to high rise buildings, high exposure conditions) - minimum PG40

To help you determine NAFS requirements for your region, please visit [www.fenestrationcanada.ca/calculator](http://www.fenestrationcanada.ca/calculator)

# ENERGY STAR®

ENERGY STAR® is a government backed program to help consumers identify energy efficient products. It is a voluntary program administered by Natural Resources Canada.

All Weather Windows products are labeled with an ENERGY STAR® label outlining product performance and zone ratings. Depending on the product and configuration, zone ratings will vary. Talk to an All Weather Windows customer service or sales representative or visit [allweatherwindows.com/energy-efficiency](http://allweatherwindows.com/energy-efficiency) for more information.

<sup>1</sup>NAFS performance grade (PG) requirements can vary by region and/or terrain type. Not all options/configurations may meet your area's specific requirements. Check with an All Weather Windows sales representative to help determine which products will best suit your requirements. ENERGY STAR® is a registered trademark of the U.S. EPA and is administered in Canada by Natural Resources Canada.

# ENTRY DOOR SYSTEM

## NOW EVEN TOUGHER

How do you improve on an entry door system that boasts superior drainage, robust construction and an enhanced seal for overall performance and stability? You listen to customer feedback, review its performance in the field, and build it even better with plenty of cool new options. Combine that together and you have our NEW All Weather Windows entry door system. Our latest entry door design includes improved sealing and key new features to protect you from the elements more effectively than ever.

## COMFORT IN, WEATHER OUT

Enhanced multilock, replaceable sill cover, and improved sealing, giving you greater protection from the elements. Our extended sill is designed to work with standard size aluminum storm doors.

*See page 100 for more details on our multilock system.*

## COMPOSITE JAMB OPTIONS

Optional low-maintenance smooth composite jamb offers higher durability and resists moisture, rot and mildew. Available in white - or add black wrap for additional style.

## NAFS READY & CERTIFIED<sup>2</sup>

To meet the stringent North American Fenestration Standards (NAFS), our doors come with the option to be fully NAFS certified.<sup>2</sup>

<sup>2</sup>NAFS certification available by request only at the time of order. NAFS performance grade (PG) requirements can vary by region and/or terrain type. Not all options/configurations may meet your area's specific requirements. Check with an All Weather Windows sales representative to help determine which products will best suit your requirements.

# MULTILOCK HARDWARE

## THE 3-POINT DIFFERENCE

To create the ultimate weather-proof seal, All Weather Windows offers a 3-point multilock door hardware system. This innovative locking system is smart, sophisticated, and packed with features making it the optimal choice in security and performance. These features include:

- » Active hardware in 3-point hook and claw<sup>1</sup> mechanism for a tighter seal
- » Unique “Duo-Glide” lock mechanism. Superior to standard single drive systems, the “Duo-Glide” two-way action balances the lock system providing smoother, quieter, and easier operation. “Duo-Glide” allows for the lock points to engage in tension rather than compression thereby reducing stress on other elements of the lock system for longer life
- » Anti-slam device for added safety and gasket protection
- » Laminated stainless steel deadbolt with anti-saw pin
- » Anti-back drive feature prevents tampering
- » Latch wear strip prevents marring the centre of the striker plate
- » 90 degree thumb-turn deadbolt operation located above the handle

Through superior craftsmanship, materials and handle styles, our multi-point hardware takes the guesswork out of selecting the right hardware for your door. With a wide selection of premium finishes, you'll be sure to perfectly match your door with the rest of your home's finishes.

3-Point "Hook & Claw"  
Multilock Assembly

## MULTILOCK HARDWARE STYLE OPTIONS

## MULTILOCK HARDWARE FINISH OPTIONS

<sup>1</sup>Shoot bolt system is used for passive hardware on a double doors with astragal post.

<sup>2</sup>Athena and Stuttgart handles are available in Flat Black, Satin Nickel and Oil Rubbed Bronze only.

<sup>3</sup>Satin Nickel is available on Athena and Stuttgart handle styles only.

## TAKE YOUR DOOR TO THE NEXT LEVEL

Make a lasting impression and an unforgettable look by adding internal grilles or SDL's to your entry door. Internal grilles and SDL's add a touch of elegance and give your door a traditional feel.

## INTERNAL GRILLES

Internal grilles are installed between panes of glass, leaving the exposed interior and exterior glass smooth and easy to clean. Grilles provide a beautiful look of divided light, while being virtually maintenance free.

### GRILLE FINISHES

	Black	Gold	Lead	Patina	White	Wicker

### GRILLE PATTERNS<sup>1</sup>

### GRILLE SIZES

## SDL (SIMULATED DIVIDED LITES)

Simulated Divided Lites (SDL) are installed on the exterior and interior of the glass surface to simulate the look of divided panes of glass. Traditionally, individually divided panes of glass reduce energy efficiency by creating multiple seams and joints for every pane. With the simulated design, you get the beautiful look of divided glass, without sacrificing energy efficiency.

### SDL PATTERNS<sup>1</sup>

### SDL SIZES

<sup>1</sup>Available on clear and textured glass only (see page 86). Not available on decorative glass.

# BRICKMOULD, HINGES & STRIKER PLATES

## BRICKMOULD

Brickmould is the moulding that fills the gap between where the door and wall meet. Our aluminum 3/4" slimline brickmould includes an integrated nail flange, while our 2" renovation option boasts a discreet screw channel and cover, making it the perfect choice for replacing your existing door.

In addition to our aluminum brickmould options, we offer primed wood brickmould in 3 different profiles.

## HINGES & STRIKER PLATES

Premium 4-1/2" hinges with a 5/8" radius are included on all doors in a variety of finishes to perfectly compliment the rest of your hardware. For a smoother and quieter swing, upgrade to ball bearing hinges or choose self-closing to ensure your door always remains closed. Our doors also include adjustable striker plates to ensure easy maintenance and the best possible door seal.

# DOOR SLAB & FRAME FINISHES

## PRE-PAINTED AND PRE-STAINED DOOR SLAB FINISHES

Offering superior durability, extended service life and exceptional chemical resistance, our pre-painted doors offer a professionally-finished solution. Available on smooth fibreglass and woodgrain textured fibreglass door slabs, choose from a variety of stunning factory-applied paint and stain finishes.<sup>1</sup>

### PAINT FINISHES

### STAIN FINISHES

## EXTERIOR CLADDED DOOR FRAME FINISHES

All door frames come standard with a metal cladded exterior which protects the door frame while adding colour and a seamless finish. With a wide selection of standard and premium colour finishes to choose from, you are sure to find the perfect match for your home and style.

### EXTERIOR METAL CLAD COLOURS<sup>2</sup>

<sup>1</sup>Actual colours may vary. Available on fibreglass doors only. Finishing includes all 6 sides of door slab and glass insert frames (if applicable). Finishing is not offered on door frame components, including exterior frame and interior jamb.  
<sup>2</sup>Actual colours may vary. Premium colours have an additional upcharge including a colour setup fee and may have an extended lead time. Options shown do not apply to steel adjustable Fast-Frame®.

Note: All dimensions shown here are for planning/estimation purposes only. Rough opening sizes shown are recommendations only and actual rough openings in your home may vary. Depending on the configuration and product selection, rough opening dimensions may be different. Floor coverings can affect rough opening heights. Always verify final door unit dimensions on your All Weather Windows quote.

# MEASURING YOUR DOOR

## STEP 1

### MEASURE YOUR DOOR SLAB WIDTH

This is the measurement from the left edge of your door slab, straight across to the right edge (A).

## STEP 2

### MEASURE YOUR DOOR SLAB HEIGHT

This is the measurement from the top edge of your door slab, straight down to the very bottom, excluding the door sweep (B).

## STEP 3

### DETERMINE YOUR DOOR FRAME JAMB DEPTH

Your door jamb is the overall depth of your door frame which transitions from the exterior of your home to the interior and meets up with your casing. This measurement usually includes the exterior sheathing, stud and drywall thicknesses. This measurement is not always easy to determine, so do not worry if you cannot get an exact measurement. A qualified installer can help.

## STEP 4

### DETERMINE THE HANDING AND SWING

Using the diagrams below, determine and select the swing and handing of your existing door. Remember, always view and determine your door handing and swing from the **EXTERIOR** of your home.

## STEP 5

### FINAL CALCULATIONS

After determining your existing door slab measurements from steps 1 & 2, record them in the first row below. Next, add the necessary measurement shown to determine the overall outside measurement (OSM) of your door frame.

WIDTH	HEIGHT	DEPTH
Slab width from Step 1:	Slab height from Step 2:	Jamb depth from Step 3:
<input type="text"/>	<input type="text"/>	<input type="text"/>
ADD: <b>1-3/4"</b>	ADD: <b>2-1/8"</b> for inswing doors or <b>2"</b> for outswing doors	
Overall door OSM width:	Overall door OSM height:	Overall door jamb depth:
<input type="text"/>	<input type="text"/>	<input type="text"/>

# DOOR PLANNER

## NOW LET'S MAKE IT HAPPEN

Now that you're inspired and have the confidence to create a door that perfectly compliments your style and personality, use the section below to sketch out and plan each of your dream doors. Once complete, simply bring in this page to an All Weather Windows sales representative or authorized dealer and we'll make it happen!
