WELCOME

ALL WEATHER  
AT HOME™

# Welcome to All Weather at Home.

On behalf of the entire team, we're thrilled to have you as part of the All Weather family. At first glance, we're a window, door, and glass company. But what we build goes far beyond the products we make. We bring people together and brighten the spaces that frame lives, homes, and communities—because that's what truly matters.

For over 45 years, this belief has shaped everything we do. Our story is one of steady progress, grounded in the knowledge that the road to success is always under construction. Every project we take on is a chance to build something lasting—for our customers, partners, and communities.

Whether you're building a family's dream home, partnering with a team you can count on to strengthen your business, or renovating with care, we're here to make it seamless. Thank you for trusting us to be part of your journey.

Let's get building—together.

  
**Jilene Lakevold**  
co-CEO

  
**Colin Wiebe**  
co-CEO

At All Weather at Home, it's always been about more than just products—our core focus is the people behind them and the relationships we build. Every project is a partnership, where we work hand-in-hand with you to make your vision a reality. Our product lines are easy to navigate, our catalogues are designed to inspire, and our team is here to help you make confident choices that meet your needs, vision, and style.

We're more than a product provider; we're a partner, helping you create a home that's truly yours.

## Over four decades of giving

We're committed to positively impacting lives and communities across Canada and proudly give back in four key areas: strengthening families, providing shelter, supporting education and health and wellness. Over the years this has included charitable giving, partnerships, employee volunteerism and supporting families in need, but one thing never changes – we show up for the moments that matter.

## Proudly Canadian

Since 1978, we've been dedicated to crafting Canadian-made windows and doors that can stand up to the country's unique climate. Nearly five decades later, All Weather at Home has grown to become one of Canada's largest window and door manufacturers.

Our 261,000 square-foot manufacturing facility in Edmonton, Alberta, produces a full range of award-winning, energy-efficient, and weather-resistant products that frame peoples' lives. From keeping the cold out in the winter to saving energy and reducing environmental impact year-round, every product is crafted with care, as if it were for our own homes

Our products include many industry firsts and award-winning designs, in addition to meeting the stringent performance requirements of ENERGY STAR® and North American Fenestration Standards (NAFS). We've received several accolades from ENERGY STAR® over the years, including the Special Recognition Award in 2023 and 2024, and have been acknowledged as one of Canada's Best Managed Companies 15 years in a row.

Platinum member

1978 Harry Buhler and Gord Wiebe receive their first order from Stuart Ford.

# Be inspired. **Get creative.**

## Your dream door starts here.

We understand the thought and care that go into choosing a door. It's more than just an entryway—it's a statement about your home and a reflection of your style. That's why we've designed this collection to make finding the perfect door an effortless and inspiring experience. With quality you can trust, your only focus is finding the one that feels right for you.

To make the process even easier, our catalogue is split into two sections: Inspire and Create.

**Inspire** is where your vision begins. Explore door materials, decorative glass styles, and timeless designs to spark ideas and narrow down the options that best suit your style. Each page is crafted to help you imagine the possibilities, guiding you toward the perfect match.

Once your inspiration takes shape, turn to **Create** for the details. Here you'll find the technical information needed to bring your door to life, including measurements, options, and hardware finishes. It's a simple, intuitive way to move from idea to reality.

Whether you're dreaming or designing, we've got you covered every step of the way.

Be inspired. Get creative.

# New & trending **door** **highlights.**

First  
impressions  
matter.

Explore our curated collection of new and trending door designs—where modern style meets timeless elegance. A thoughtfully designed door does more than frame your entryway; it defines the aesthetic of your entire home. From sleek lines and bold finishes, to intricate glass designs and solid panels, today's contemporary doors set a fresh standard for style and sophistication.

Discover how the right door can create a powerful first impression while reflecting your home's unique character and your individual personality.

2 PANEL SHAKER 8'0" smooth fibreglass door 42

## Shake things up.

Available in smooth and fir grain textured fibreglass, our shaker doors are designed with today's home styles in mind. Pair with complementary interior doors and cabinets for a coordinated modern look throughout your home.

1 PANEL SHAKER fir woodgrain textured fibreglass door 40

2 PANEL SHAKER smooth fibreglass door 42

## Next level colour.

Want a door that perfectly fits your custom-styled home? Or one that's completely unique and truly stands out? Personalize your doors with our factory paint and stain colour options for smooth and woodgrain textured fibreglass doors.

*Discover our pre-painted and pre-stained options on page 105*

**MID-CENTURY MODERN** clear glass 74 smooth fibreglass door 42

# Elegance in simplicity.

Who said basic isn't beautiful? Sometimes the most daring statements are made in the subtlest way. Flush doors perfectly compliment mid-century modern and art deco architecture, especially with a burst of colour.

**FLUSH** smooth fibreglass door 42 full clear glass sidelites pre-finished in slate

**FLUSH** smooth fibreglass door 42 full clear glass sidelite & transom

# Choosing a door **inspired by you.**

Beyond the functionality, the type of door you choose can say a lot about who you are. Welcoming. Bold. Charming. These are just a few of the words that come to mind when thinking about the connection between door and homeowner.

Choosing the right doors for your home shouldn't feel overwhelming. To help you choose the doors that deliver the appearance and performance you want, keep these following three simple steps in mind as you explore our catalogue.

## **1 Be inspired**

Let your personal style and vision guide you in selecting the perfect entry door.

Think about your own personality. Do you like to make a statement or do you prefer a subtle effect? Is your home's style more classic or contemporary? Do you have a specific colour scheme in mind?

We have many options so take your time to be inspired and discover your style.

## **2 Choose a material**

Doors are built with a variety of material and each material offers its own benefits and aesthetic appeal.

Choose from woodgrain-textured fibreglass that has the appearance of real wood, smooth fibreglass that can be painted any colour, or one of our prefinished steel skin doors for added security.

Be sure to consider the right material to meet your individual needs for you and your home.

## **3 Accentuate**

This is when you can really begin to customize your door and bring your vision to life.

Choose from a variety of custom sidelites, designer transoms and decorative glass inserts while tying all the accents together by coordinating grille, casing and hardware colours.

Whatever the desired end product, these options can make the bold or subtle statement you're looking for.

## Barrington® Sierra® Mahogany Texture Fibreglass

Taking inspiration from the craftsman style, Sierra introduces elegantly embossed panels for a bold take on a traditional look.

\$\$\$\$

### AUTHENTIC EMBOSSING

Deep, defined embossing mimics that of traditional hand-crafted wood doors.

### MATCHING STILES

Real mahogany-capped, square edge stiles offer an authentic wood look.

Discover more on page **30**

## Contemporary Cherry Textured Fibreglass

Using NVD Technology, cherry grain doors achieve a wood grain texture that is indistinguishable from real wood.

\$\$\$\$

### STAINLESS STEEL EMBELLISHMENTS

Stainless steel strips are inlaid directly into the fibreglass skin.

### CONTEMPORARY CHERRY GRAIN

Cherry grain brings warmth and modern texture to any entry way.

Discover more on page **32**

## Contemporary Cherry Textured Fibreglass

Simple and pure in design, our contemporary cherry collection achieves bold, modern design with all the benefits of fibreglass.

\$\$\$

### GROOVED LINES

Gentle, recessed lines are engraved right into the fibreglass skin.

### OVERSIZED STILES

Oversized 4-1/8" LSL stiles give added strength and help prevent warping.

Discover more on page **32**

## Rustic Mahogany Textured Fibreglass

Our luxury textured fibreglass rustic doors add warmth to your home while accentuating personal style with a distinctly European feel.

\$\$\$

### AUTHENTIC EMBOSSING

*Deep, defined embossing mimics that of traditional hand-crafted wood doors.*

### LUXURY MAHOGANY WOOD GRAIN

*Detailed texture replicates real mahogany grain.*

*Discover more on page 34*

## VistaGrande® Fir Textured & Smooth Fibreglass

Instantly brighten and beautify any space with wider, factory-flush glazing - you can truly bring the outdoors in.

\$\$\$

### CUSTOM FACTORY FLUSH-GLAZING

*Offers a cleaner, more refined appearance and wider viewing area.*

### INTERNAL MINI BLINDS

*Maintenance-free internal mini blinds provide privacy without losing your view.*

*Discover more on page 36*

## Craftsman Smooth Fibreglass

With a pre-pigmented white skin, smooth craftsman doors are a beautiful, long-lasting alternative to steel entry doors.

\$\$\$

### HYDROSHIELD TECHNOLOGY™

*Smooth skin craftsman entry doors will not dent, rust or delaminate.*

### CUSTOM FACTORY FLUSH-GLAZING

*Offers a cleaner, more refined appearance for an authentic craftsman look.*

*Discover more on page 38*

## Textured Woodgrain Fibreglass

Featuring distinct architectural details, 3 authentic grain patterns, and endless customizable glass and panel combinations.

\$\$\$

### MAHOGANY, OAK & FIR WOODGRAIN

*Make a bold statement with variable-depth woodgrain patterns.*

### HIGH-DEFINITION PANEL PROFILE

*Detailed and well-defined panel profile adds architectural appeal.*

*Discover more on page 40*

## Smooth Fibreglass

With a smooth, paintable, low-maintenance fibreglass surface, these doors are sure to fit any architectural style.

\$\$\$

### HIGH-PERFORMANCE SMOOTH SURFACE

*Ideal for painting & will not rust or dent.*

### LIMITLESS CUSTOMIZATION

*From decorative glass to grilles and panels, the hardest part is deciding.*

*Discover more on page 42*

## Prefinished Steel

Boasting high-definition panel profiles and endless glass options, our steel doors offer the most in flexibility and security.

\$\$\$

### PREFINISHED WHITE OR BLACK

*High-quality factory applied white or black painted surface.<sup>1</sup>*

### ROT-RESISTANT BOTTOM RAIL

*High-quality composite bottom rail and wood-edge construction resists rot and corrosion.*

*Discover more on page 44*

<sup>1</sup> Door glass insert frames do not come prefinished and need to be painted to match the door. Black prefinished doors come with a black exterior only and are not available with door glass. The interior surface is prefinished in white only.

Be bold.

Who says you need glass to make a statement? Create dramatic intrigue with a solid panel Barrington® Sierra® fibreglass door. After all, simple is beautiful.

BARRINGTON® SIERRA® 2 panel plank

Be bold. Barrington® Sierra® doors are the pinnacle of woodgrain solid-panel doors. Featuring all the benefits of Barrington luxury fibreglass, this series will be sure to impress for years to come.

### **Authentic mahogany woodgrain texture**

The highly detailed mahogany grain adds sophistication & richness to any entrance.

*Barrington Sierra mahogany pre-finished in cedar stain*

### **Inspired rustic design**

Vertical planks and soft arches echo rustic flair and authentic craftsmanship.

*Barrington Sierra mahogany pre-finished in raven stain*

### **Matching wood stiles**

Real mahogany-capped, true square-edge stiles offer an authentic wood look.

*Barrington Sierra mahogany pre-finished in mahogany stain*

# Contemporary Cherry Designer Fibreglass

Not your  
ordinary cherry.

Our contemporary cherry grain doors combine the strength and durability of fibreglass with the elegance and style of today's modern designs.

**CONTEMPORARY CHERRY C501** textured fibreglass door with grooved lines

Simple and pure in design, our contemporary cherry collection achieves bold design through stainless steel embellishments or simple grooved lines. Made with high quality cherry grain textured fibreglass, this door adds warmth and texture to any entry way.

### **Stainless steel embellishments**

Stainless steel bars in the fibreglass surface create a bold, ultra-modern look.

### **Contemporary embossing**

Simple, symmetrical grooves bring a refined and fresh feel to any modern style.

### **Variable-depth cherry grain texture**

Cherry brings warmth with its well-defined texture, perfect for any modern architecture.

# Craftsman Smooth Premium Fibreglass

## Craftsman redefined.

With a paintable, smooth finish and a high definition panel profile, the Craftsman door exudes contemporary style while also offering the low-maintenance upkeep of fibreglass.

**CLEAR 3 LITE SDL** 24-1/2" x 16-5/8" glass

Enjoy the rustic charm of Craftsman doors: mission-styled for an authentic wood look. Craftsman Smooth Skin fibreglass entry doors are a long-lasting alternative to steel and use an exclusive Hydroshield™ technology to resist dents, rust and delamination.

### Hydroshield™ technology

Proprietary skin technology resists the elements and everyday wear and tear.

### Pre-pigmented white fibreglass skin

Fully paintable white pre-pigmented fibreglass resists the appearance of scratches.

### Flush-glazed glass

No insert frame means no unsightly screws and a maximized glass viewing area.

Clear glass

# Operating Styles

## More than just the swing

In or out? Left or right? Single or double? A transom perhaps? Maybe a sidelite or two? The options are endless. Designing your door can be as simple as matching an existing door or as complex as a multi-part configuration. It's all up to you. Be bold. Be creative!

## Double & Garden Doors

Double and garden doors may seem similar, but there is one noticeable difference. Garden doors consist of one main operating door and one fixed or venting door with a stationary centre post. Double doors however, can be fully opened to create a single large opening. The centre post, known as an astragal, is attached to one of the two doors. The astragal post uses top and bottom flush-bolts to secure it into place when both doors are not in use.

### GARDEN DOOR

*Left door slab is operating, right door slab is venting. Centre post is stationary.*

### DOUBLE DOOR

*Left door slab is operating, right door slab is inactive with centre post (astragal) attached.*

## Sidelites

Sidelites not only enhance the look and size of your door, but they can also add additional benefits. Using a full glass sidelite can increase the amount of sunlight that enters into your home while maximizing the overall width of your door. Full glass sidelites can also be customized to varying widths. Adding venting panel sidelites can help promote airflow and increase ventilation. Sidelites are available in hundreds of styles to perfectly and seamlessly match your door.

### FULL GLASS SIDELITE

*Clear or textured sealed units are glazed directly into the door frame and cannot be vented (door shown as an outswing).*

### PANEL SIDELITE

*12 or 14 inch door panels are either fixed into the door frame or vented out using a crank mechanism (door and sidelite shown as an outswing).*

## Transoms

Limited by width? Why not go higher? Transoms allow increased sunlight into your home while increasing beauty and elegance. Transoms are fully customizable with a large selection of shapes, sizes and clear and textured glass options.

Rectangle

Right Triangle

Half Round

Rectangle

Trapezoid

Pentagon

Extended Eyebrow

3-Wide Rectangle

**Note:** Garden doors include an interior "in-frame" screen on the venting slab only. A sliding exterior screen is available on garden doors only when the following 3 conditions are met: 1) inswing configuration, 2) one slab is fixed, 3) 6-9/16" minimum jamb depth. Screens are not available on double door configurations. Venting sidelites may not meet current building codes for your area.

# Handing & Swing

**Note:** Additional handing and swing options may be available depending on your door configuration. Talk to an All Weather at Home representative to help you design a door that works best for you.

# Fire Rated Door System

## The ultimate fire rated door system

Our 90-minute fire rated door system comes pre-hung and utilizes the innovative adjustable Fast-Frame® by Timely®. Fast-Frame's® advanced design adds a new dimension of flexibility and durability to our steel entry door line. Adjustable up to a full 1", the frame can accommodate almost any variation of wall construction. This easy-to-install, user-friendly, kerfed white galvanized steel door frame system is applicable to a full range of residential and commercial applications—wood or steel stud construction. Our fire rated door system is engineered to meet the most stringent code requirements including structural, impact and 90-minute fire ratings.

A 20-minute option is also available and includes a wood finger joint pine (FJP) jamb.

## Fast-Frame® Construction<sup>1</sup>

<sup>1</sup>Fast-Frame® is available on 90-minute fire rated door systems only.

**Note:** For more information on fire rating requirements and to order, please talk to an All Weather at Home representative. Extended lead times apply.

## Fire Labels

Our fire rated door systems include a 20 and 90-minute fire rating option. This includes all components of the door frame, steel door slab, hinges, and striker plates.

## Warranty

A 2 year limited manufacturer warranty against defects in materials and craftsmanship is included on all fire rated door systems.

## Closure Test

Fire rated door systems will close and latch from 18" if the following Fast-Frame<sup>®1</sup> components are used:

- ▷ QEBD500 compression weatherstripping
- ▷ factory sweep
- ▷ adjustable T-strike
- ▷ factory supplied sills
- ▷ self-closing hinges

## Door Styles

Both 20 and 90-minute options are available in a 6-panel steel skin slab. 90-minute doors also come with a steel flush slab option.

## Feature & Sizing Availability

	20 Minute	90 Minute
<b>Slab Construction</b>	Wood Edge	Steel Edge
<b>Jamb</b>	Finger Joint Pine (FJP)	Steel Fast-Frame <sup>®</sup>
<b>Glass Inserts</b>	No	No

### FAST-FRAME<sup>®</sup> SILLS<sup>1</sup>

#### STANDARD INSWING

Thermally broken - 5-5/8" width with optional extenders

**Note:** Not for use on outswing applications

#### BUMPER OUTSWING

4-9/16" width with integrated weather seal.

**Note:** Not for use on inswing applications.

#### HANDICAP (ADA)

Double slope 4-9/16" & 6-9/16" widths 

## Rough Opening Sizes

	Nominal Door Size	Rough Opening Size (wood stud)
<b>6'8" Height</b>	2'6" x 6'8"	31-1/4" x 81-3/8"
	2'8" x 6'8"	33-1/4" x 81-3/8"
	2'10" x 6'8"	35-1/4" x 81-3/8"
	3'0" x 6'8"	37-1/4" x 81-3/8"
<b>8'0" Height</b>	2'8" x 8'0"	33-1/4" x 97-3/8"
	2'10" x 8'0"	35-1/4" x 97-3/8"
	3'0" x 8'0"	37-1/4" x 97-3/8"

**Note:** All dimensions shown are for doors with a standard inswing sill. Deduct 13/16" for bumper, outswing or handicap compliant sills.

 **STRUCTURAL PERFORMANCE & IMPACT RATING:** Design pressure ratings are available for compliance with national, state and local wind load and/or missile requirements. Product tested for structural and impact performance in accordance with TAS 201, 202, and 203. Product approval available under the Florida Department of Community Affairs (FL10357). **Note:** Structural and Impact performance requires use of a hurricane grade 5/8" T-astagal for double doors.

# NAFS

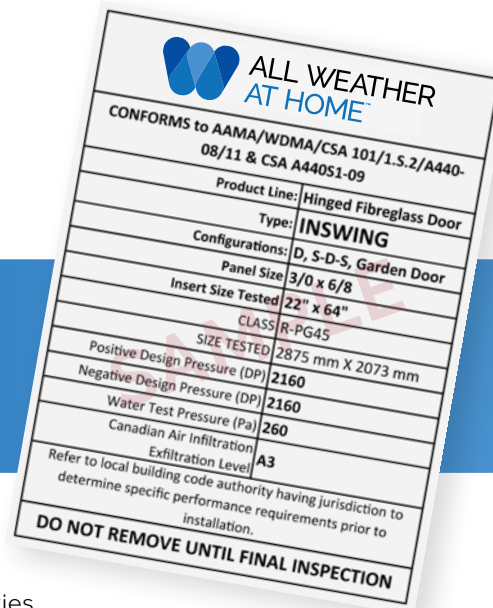

## What is NAFS?

The North American Fenestration Standard (NAFS) is designed to combine the fenestration testing and ratings process previously done by organizations such as AAMA, WDMA and CSA, into a harmonized North American Standard. It has been incorporated into the National Building Code of Canada and implemented across Canadian provinces.

NAFS Certification requires stringent standards be met for:

- ▷ Air tightness
- ▷ Water penetration resistance
- ▷ Structural performance under wind loads
- ▷ Forced entry resistance

All Weather at Home offers NAFS tested and certified windows and doors, available in nearly every product series and configuration.\* Each NAFS certified product is clearly labeled, outlining the PG value and any specific ratings such as water and air resistance values.

## Performance grade & class

Ratings are based on a combination of a product's structural properties and its ability to resist water. As a result, a single numeric rating is assigned to each product. This rating is called the **Performance Grade (PG)**.

NAFS has also categorized the application of fenestration products into four groups. Each of these groups is called a **Performance Class**. Each class requires products that meet a minimum performance grade.

The performance classes and applicable minimum performance grades are:

- R:** Residential (one and two family) - minimum PG15
- LC:** Light Commercial (low rise and multi-family dwellings) - minimum PG25
- CW:** Commercial Window (low rise and multi-family dwellings, higher loads and larger sizes) - minimum PG30
- AW:** Architectural Window (mid to high rise buildings, high exposure conditions) - minimum PG40

# ENERGY STAR®

ENERGY STAR® is a government backed program to help consumers identify energy efficient products. It is a voluntary program administered by Natural Resources Canada.

All Weather at Home products are labeled with an ENERGY STAR® label outlining product performance and zone ratings. Depending on the product and configuration, zone ratings will vary. Talk to an All Weather at Home customer service or sales representative or visit [allweatherathome.ca](http://allweatherathome.ca) for more information.

\*NAFS performance grade (PG) requirements can vary by region and/or terrain type. Not all options/configurations may meet your area's specific requirements. Check with an All Weather at Home sales representative to help determine which products will best suit your requirements. ENERGY STAR® is a registered trademark of the U.S. EPA and is administered in Canada by Natural Resources Canada.

# Entry Door System

## Now even tougher

How do you improve on an entry door system that boasts superior drainage, robust construction and an enhanced seal for overall performance and stability? You listen to customer feedback, review its performance in the field, and build it even better with plenty of cool new options. Combine that together and you have our NEW All Weather at Home entry door system. Our latest entry door design includes improved sealing and key new features to protect you from the elements more effectively than ever.

## Comfort in, weather out

Enhanced multilock, replaceable sill cover, and improved sealing, giving you greater protection from the elements. Our extended sill is designed to work with standard size aluminum storm doors.

*See page 102 for more details on our multilock system.*

## Composite jamb options

Optional low-maintenance smooth composite jamb offers higher durability and resists moisture, rot and mildew.

Available in white - or add jet black wrap for additional style.

## NAFS ready & certified<sup>2</sup>

To meet the stringent North American Fenestration Standards (NAFS), our doors come with the option to be fully NAFS certified.<sup>2</sup>

<sup>2</sup>NAFS certification available by request only at the time of order. NAFS performance grade (PG) requirements can vary by region and/or terrain type. Not all options/configurations may meet your area's specific requirements. Check with an All Weather at Home sales representative to help determine which products will best suit your requirements.

# Multilock Hardware

## The 3-point difference

To create the ultimate weather-proof seal, All Weather at Home offers a 3-point multilock door hardware system. This innovative locking system is smart, sophisticated, and packed with features making it the optimal choice in security and performance. These features include:

- ▷ 3-point hook and claw<sup>1</sup> mechanism on active hardware for a tighter seal
- ▷ Unique "Duo-Glide" lock mechanism. Superior to standard single drive systems, the "Duo-Glide" two-way action balances the lock system providing smoother, quieter, and easier operation. "Duo-Glide" allows for the lock points to engage in tension rather than compression thereby reducing stress on other elements of the lock system for longer life
- ▷ Anti-slam device for added safety and gasket protection
- ▷ Laminated stainless steel deadbolt with anti-saw pin
- ▷ Anti-back drive feature prevents tampering
- ▷ Latch wear strip prevents marring the centre of the striker plate
- ▷ 90 degree thumb-turn deadbolt operation located above the handle

Through superior craftsmanship, materials and handle styles, our multi-point hardware takes the guesswork out of selecting the right hardware for your door. With a wide selection of premium finishes, you'll be sure to perfectly match your door with the rest of your home's finishes.

3-Point "Hook & Claw"  
Multilock Assembly

## MULTILOCK HARDWARE STYLE OPTIONS

## MULTILOCK HARDWARE FINISH OPTIONS

<sup>1</sup> Shoot bolt system is used for passive hardware on a double doors with astragal post.

<sup>2</sup> Athena and Stuttgart handles are available in flat black, satin nickel and oil rubbed bronze finishes only.

<sup>3</sup> Satin nickel is available on Athena and Stuttgart handle styles only.

## Take your door to the next level

Make a lasting impression and an unforgettable look by adding internal grilles or SDL's to your entry door. Internal grilles and SDL's add a touch of elegance and give your door a traditional feel.

## Internal Grilles

Internal grilles are installed between panes of glass, leaving the exposed interior and exterior glass smooth and easy to clean. Grilles provide a beautiful look of divided light, while being virtually maintenance free.

### GRILLE FINISHES

### GRILLE SIZES

## SDL (Simulated Divided Lites)

Simulated Divided Lites (SDL) are installed on the exterior and interior of the glass surface to simulate the look of divided panes of glass. Traditionally, individually divided panes of glass reduce energy efficiency by creating multiple seams and joints for every pane. With the simulated design, you get the beautiful look of divided glass, without sacrificing energy efficiency.

### SDL PATTERNS<sup>5</sup>

### SDL SIZES

<sup>4</sup> Available on clear and textured glass only. Not available on decorative glass.

<sup>5</sup> Available on clear and opaque textured glass only. Not available on decorative glass.

# Brickmould, Hinges & Striker Plates

## Brickmould

Brickmould is the moulding that fills the gap between where the door and wall meet. Our aluminum 3/4" slimline brickmould includes an integrated nail flange, while our 2" renovation option boasts a discreet screw channel and cover, making it the perfect choice for replacing your existing door.

In addition to our aluminum brickmould options, we offer primed wood brickmould in 3 different profiles.

## Hinges & Striker Plates

Premium 4-1/2" hinges with a 5/8" radius are included on all doors in a variety of finishes to perfectly compliment the rest of your hardware. For a smoother and quieter swing, upgrade to ball bearing hinges or choose self-closing to ensure your door always remains closed. Our doors also include adjustable striker plates to ensure easy maintenance and the best possible door seal.

**Note:** Doors with both deadbolt and lockset drilling include a double adjustable striker plate while doors with only lockset drilling include a single adjustable striker plate. Doors with multilock hardware do not come with adjustable striker plates.

# Door Slab & Frame Finishes

## Pre-Painted & Pre-Stained Door Slab Finishes

Offering superior durability, extended service life and exceptional chemical resistance, our pre-painted and stained doors offer a professionally-finished solution. Available on smooth fibreglass and woodgrain textured fibreglass door slabs, choose from a variety of stunning factory-applied paint and stain finishes.<sup>1</sup>

### PAINT FINISHES

### STAIN FINISHES

## Black Pre-Painted Steel Doors

A factory-painted black exterior easily creates a dramatic statement to your entryway, while the white pre-painted interior perfectly compliments any home's decor. Available on 2 panel, 6 panel and flush steel doors.

## Door Frame Metal Cladding Finishes

All door frames come standard with a metal clad exterior which protects the door frame while adding colour and a seamless finish.

### EXTERIOR METAL CLAD COLOURS<sup>2</sup>

<sup>1</sup> Actual colours may vary. Available on fibreglass doors only. Finishing includes all 6 sides of door slab and glass insert frames (if applicable). Finishing is not offered on door frame components, including exterior frame and interior jamb.

<sup>2</sup> Available with a black exterior and white interior only. Glass insert frames come unfinished (if applicable).

<sup>3</sup> Actual colours may vary. Premium colours have an additional upcharge including a colour setup fee and may have an extended lead time. Options shown do not apply to steel adjustable Fast-Frame®.

Depending on the configuration and product selection, rough opening dimensions may be different. Floor coverings can affect rough opening heights. Always verify final door unit dimensions on your All Weather at Home quote.

# Measuring Your Door

## STEP 1

### MEASURE YOUR DOOR SLAB WIDTH

This is the measurement from the left edge of your door slab, straight across to the right edge (**A**).

## STEP 2

### MEASURE YOUR DOOR SLAB HEIGHT

This is the measurement from the top edge of your door slab, straight down to the very bottom, excluding the door sweep (**B**).

## STEP 3

### DETERMINE YOUR DOOR FRAME JAMB DEPTH

Your door jamb is the overall depth of your door frame which transitions from the exterior of your home to the interior, meeting up with your casing. This measurement usually includes the exterior sheathing, stud and drywall thicknesses. This measurement is not always easy to determine, so don't worry if you cannot get an exact measurement. A qualified installer can help.

## STEP 4

### DETERMINE YOUR DOOR'S HANDING AND SWING

Using the diagrams below, determine and select the swing and handing of your existing door. Remember, always view and determine your door handing and swing from the **EXTERIOR** of your home.

## STEP 5

### FINAL CALCULATIONS

After determining your existing door slab measurements from steps 1 & 2, record them in the first row below. Next, add the necessary measurement shown to determine the overall outside measurement (OSM) of your door frame.

WIDTH	HEIGHT	DEPTH
Slab width from Step 1:	Slab height from Step 2:	Jamb depth from Step 3:
<input type="text"/> ↓ <b>ADD 1-3/4"</b> ↓	<input type="text"/> ↓ <b>ADD 2-1/8"</b> for inswing doors or <b>2"</b> for outswing doors ↓	<input type="text"/> ↓
<b>Overall door OSM width:</b>	<b>Overall door OSM height:</b>	<b>Overall door jamb depth:</b>
<input type="text"/>	<input type="text"/>	<input type="text"/>

**Note:** There is no industry standard for door sizing, so follow these steps carefully to ensure you determine the optimal fit for your new door. It is strongly recommended to have a professional installer measure and install your door. Reach out to an All Weather at Home representative or authorized dealer for assistance.

# Door Planner

## Let's help you make it happen

Now that you're inspired and have the confidence to create a door that perfectly compliments your style and personality, use the section below to sketch out and plan each of your doors. Once complete, simply bring in this page to an All Weather at Home sales representative or authorized dealer.
